

POLE TOP PROTECTORS NOT ONLY PROTECT THE POLE TOP FROM MOISTURE AND PESTS, THEY ALSO DELIVER A POWERFUL COPPER BORATE COMPLEX TO PREVENT ANY DECAY AT THE POLE TOP.

COPPER BORATE SYNERGY

Data collected by a major North American utility shows that by incorporating pole top protection into your pole maintenance program you can extend the life of your poles by 10-15 years. This results in exponential savings for the utility.

INDUSTRY LEADING

Genics Pole Top Protector

- Copper Boron Complex.
- Strong and durable.
- Works well with existing pole top hardware.
- Long lasting impact.

WHY CHOOSE POLE TOP PROTECTORS?

Genics Pole Top Protectors are a very durable and reliable way to extend the life cycle of wood poles, posts and pilings. They protect the top of the wood from premature degradation.

Pole top decay can cause failure in the structural strength of wood that holds insulator pins, mounting brackets and other pole top hardware. This costs utilities exponentially in repairs and pole replacement.

What sets Pole Top Protectors apart from other pole top protection is that they are not bulky; pole top hardware

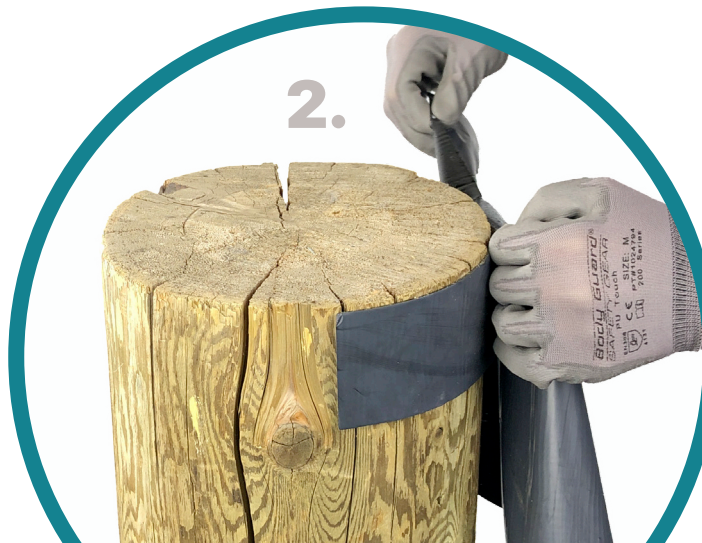

can still be easily attached to the pole. Pole Top Protectors use a recycled fiber that is infused with- copper borates to further protect the pole top from decay.

Pole Top Protectors also reduce moisture penetration and checking which results from shrinkage and expansion. With Pole Top Protectors, rain and snow cannot touch the pole top. Our highly adhesive rubber design seals the pole top entirely from insects, and moisture while also infusing the pole top with decay fighting power.

Installation instructions.

1. Peel off the backing from the Genics Pole Top Protector.
2. Align the first flap with the pole top as seen above, press the first flap into place.
3. Align the rounded middle area and press down the rounded edge of the pole top protector that is hanging over the edge on both sides.

2.

3.

4. Align the second flap to the opposite edge of the pole top, firmly pressing it in place to finish off the seal.
